
I wish I had joined TCGS years before I did. I have learned so much about various sources and repositories I never knew existed.

I have met so many wonderful people who share my interest and passion for genealogy. I love being a member of TCGS and meeting new people.

Being a member of TCGS has been one of the most fulfilling activities in my life. By helping out in various projects, I feel as if I am contributing immensely to genealogical research for others, and that feels really good.
